CONFIGURATIONS GUIDES

OUR STORY

WEATHER GUARD®, a WernerCo brand, is an industry leader in truck and van equipment, including truck boxes, drawer units, shelving, cabinets, and racks for trucks, vans and utility vehicles. WEATHER GUARD® organizes trucks and vans for greater productivity and provides tools and valuables superior protection against break-ins and weather.

1960

In the fall of 1960, Howard Knaack began building jobsite storage tool boxes in a small, one-room shop in Crystal Lake, Illinois. In 1962, Mr. Knaack began setting up a nationwide distribution network of contractor supply houses. In the late 1960s, Mr. Knaack was looking to expand his product offerings to the contractor trade and recognized the need for a high-quality truck tool box.

1968

In 1968, Knaack LLC. purchased the rights to build WEATHER GUARD® Truck Equipment, a truck tool box line consisting of approximately 10 different models, from a sheet metal contractor in St. Louis, Missouri. He continued to build these boxes in St. Louis until 1971, when Knaack LLC. doubled its manufacturing capacity. In 1973, the entire line of WEATHER GUARD® Tool Boxes was redesigned with features needed by the contractor markets that they served. Many of these innovations soon became the standard in the industry and were eventually copied by other truck tool box manufacturers.

1980

In the early 1980s, major additions were made to the WEATHER GUARD® Truck and Van Storage Equipment lines. In truck equipment, saddle boxes, super lo-side boxes, and super side boxes were added to the truck equipment line along with an expanded line of underbed boxes and truck ladder racks. In van equipment, the line was expanded to include knockdown shelving, small and medium size parts bins, expanded ladder rack offerings and also an expanded bulkhead offering. This product expansion enabled the company to expand its base of users to include municipalities, utilities, fleets, etc.

1990

In the early 1990s, WEATHER GUARD® Truck Boxes were again redesigned to increase security, safety and durability for its end users. It incorporated many items that its users are accustomed to with the automotive industry. High-quality automotive-style locks and latches were added along with other major changes.

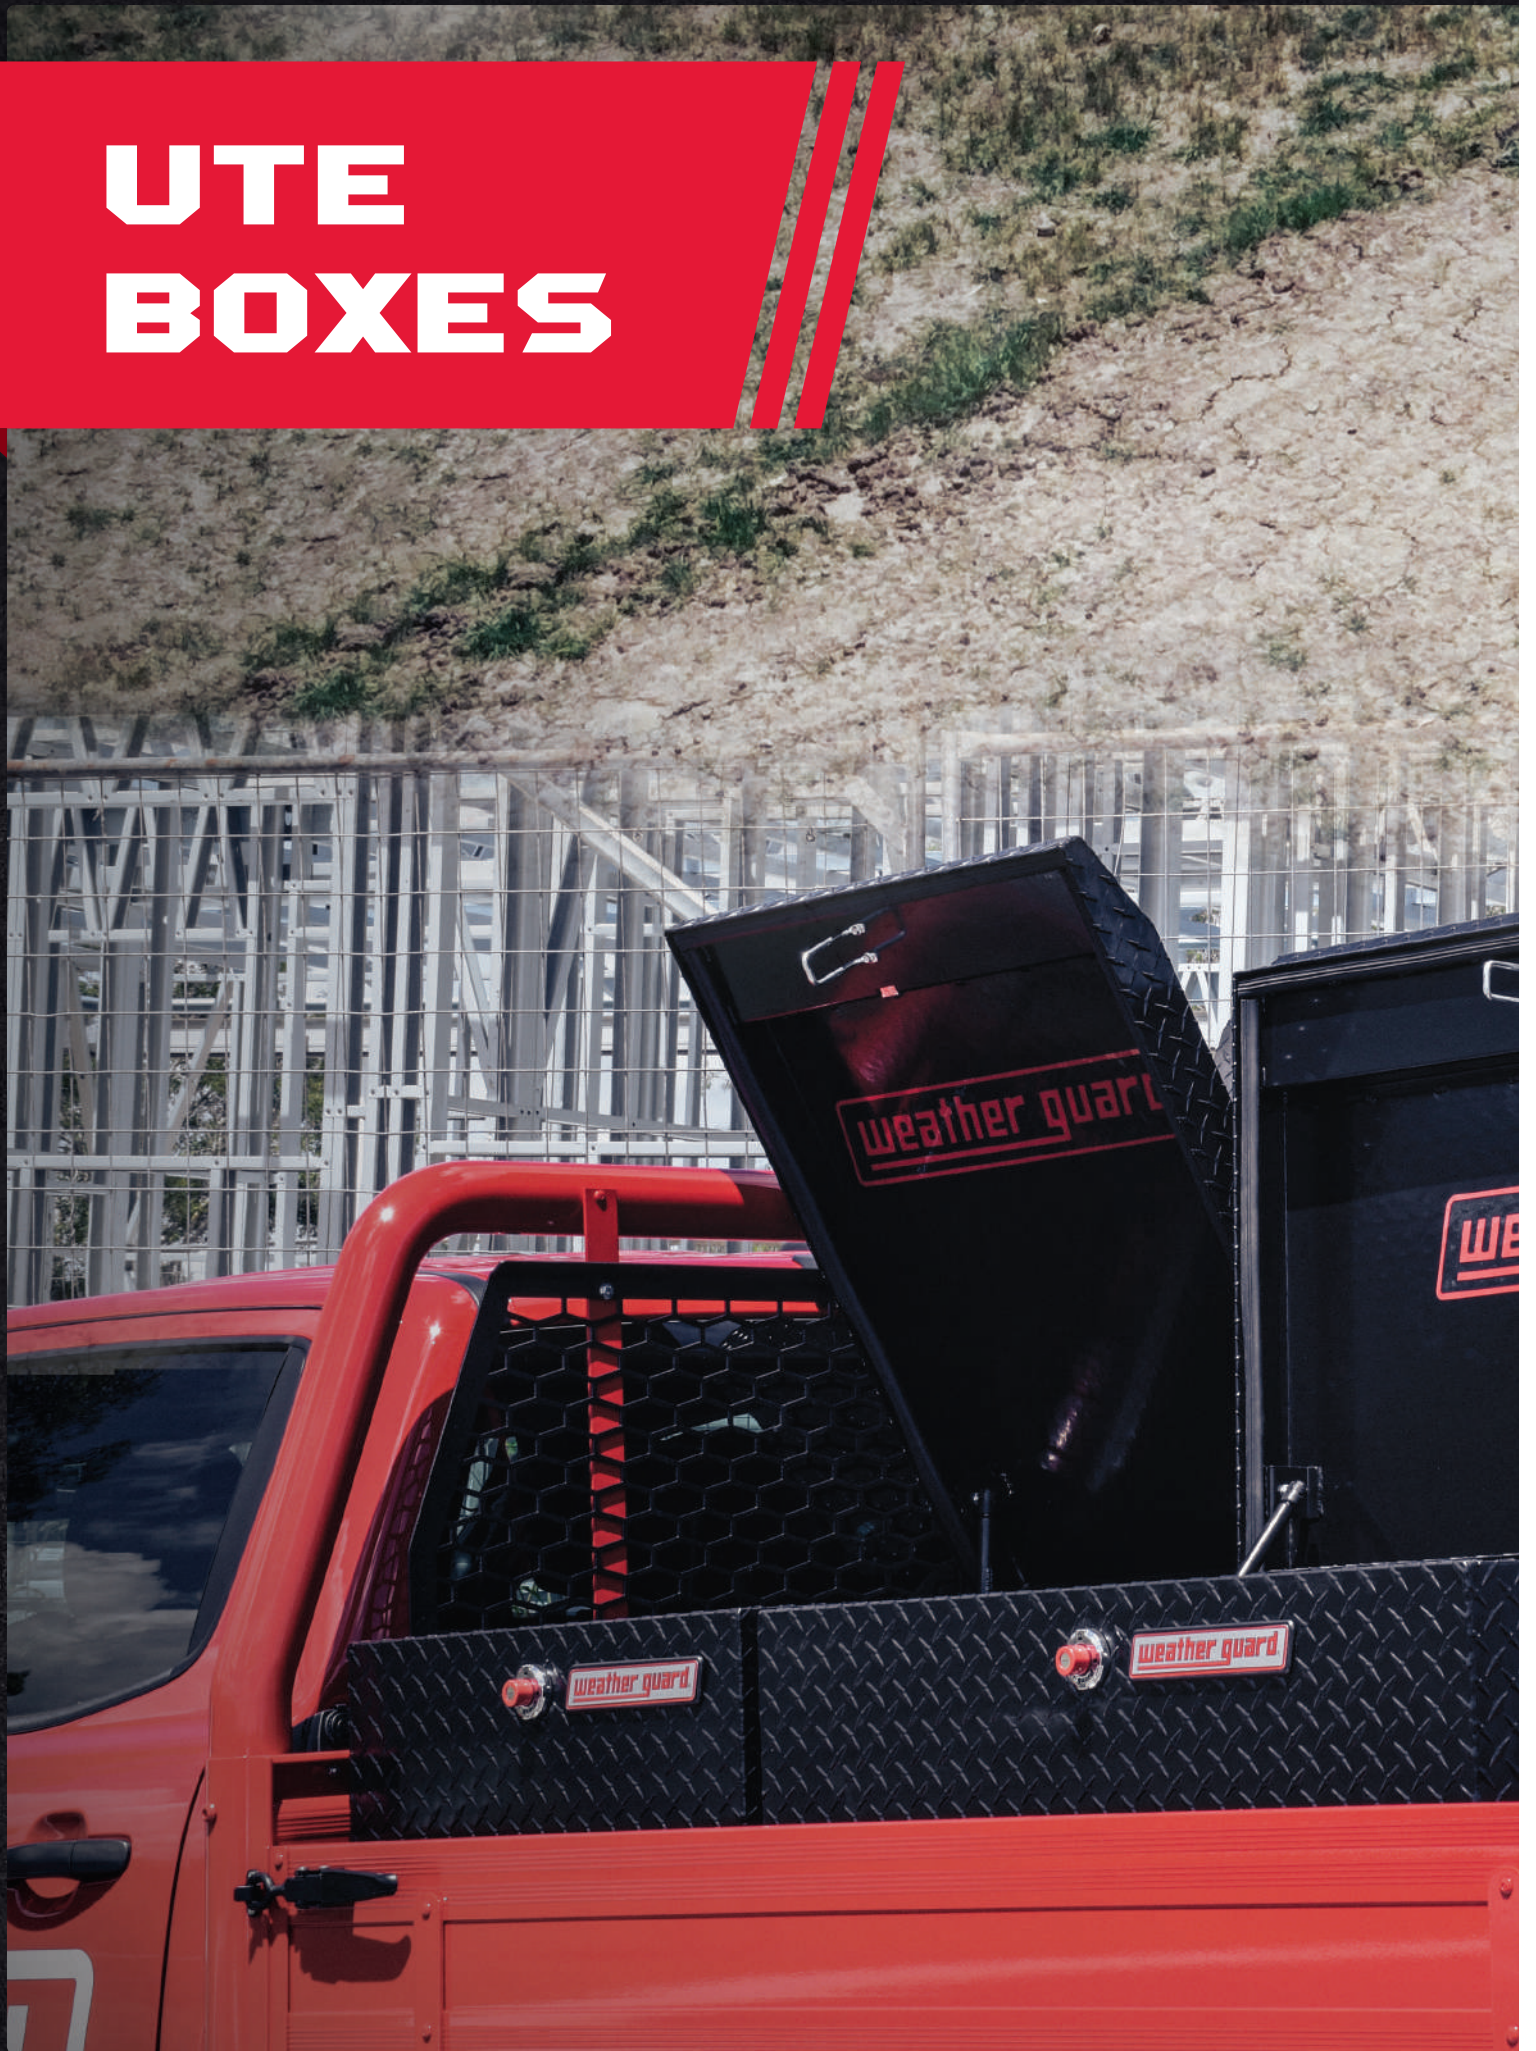

2012

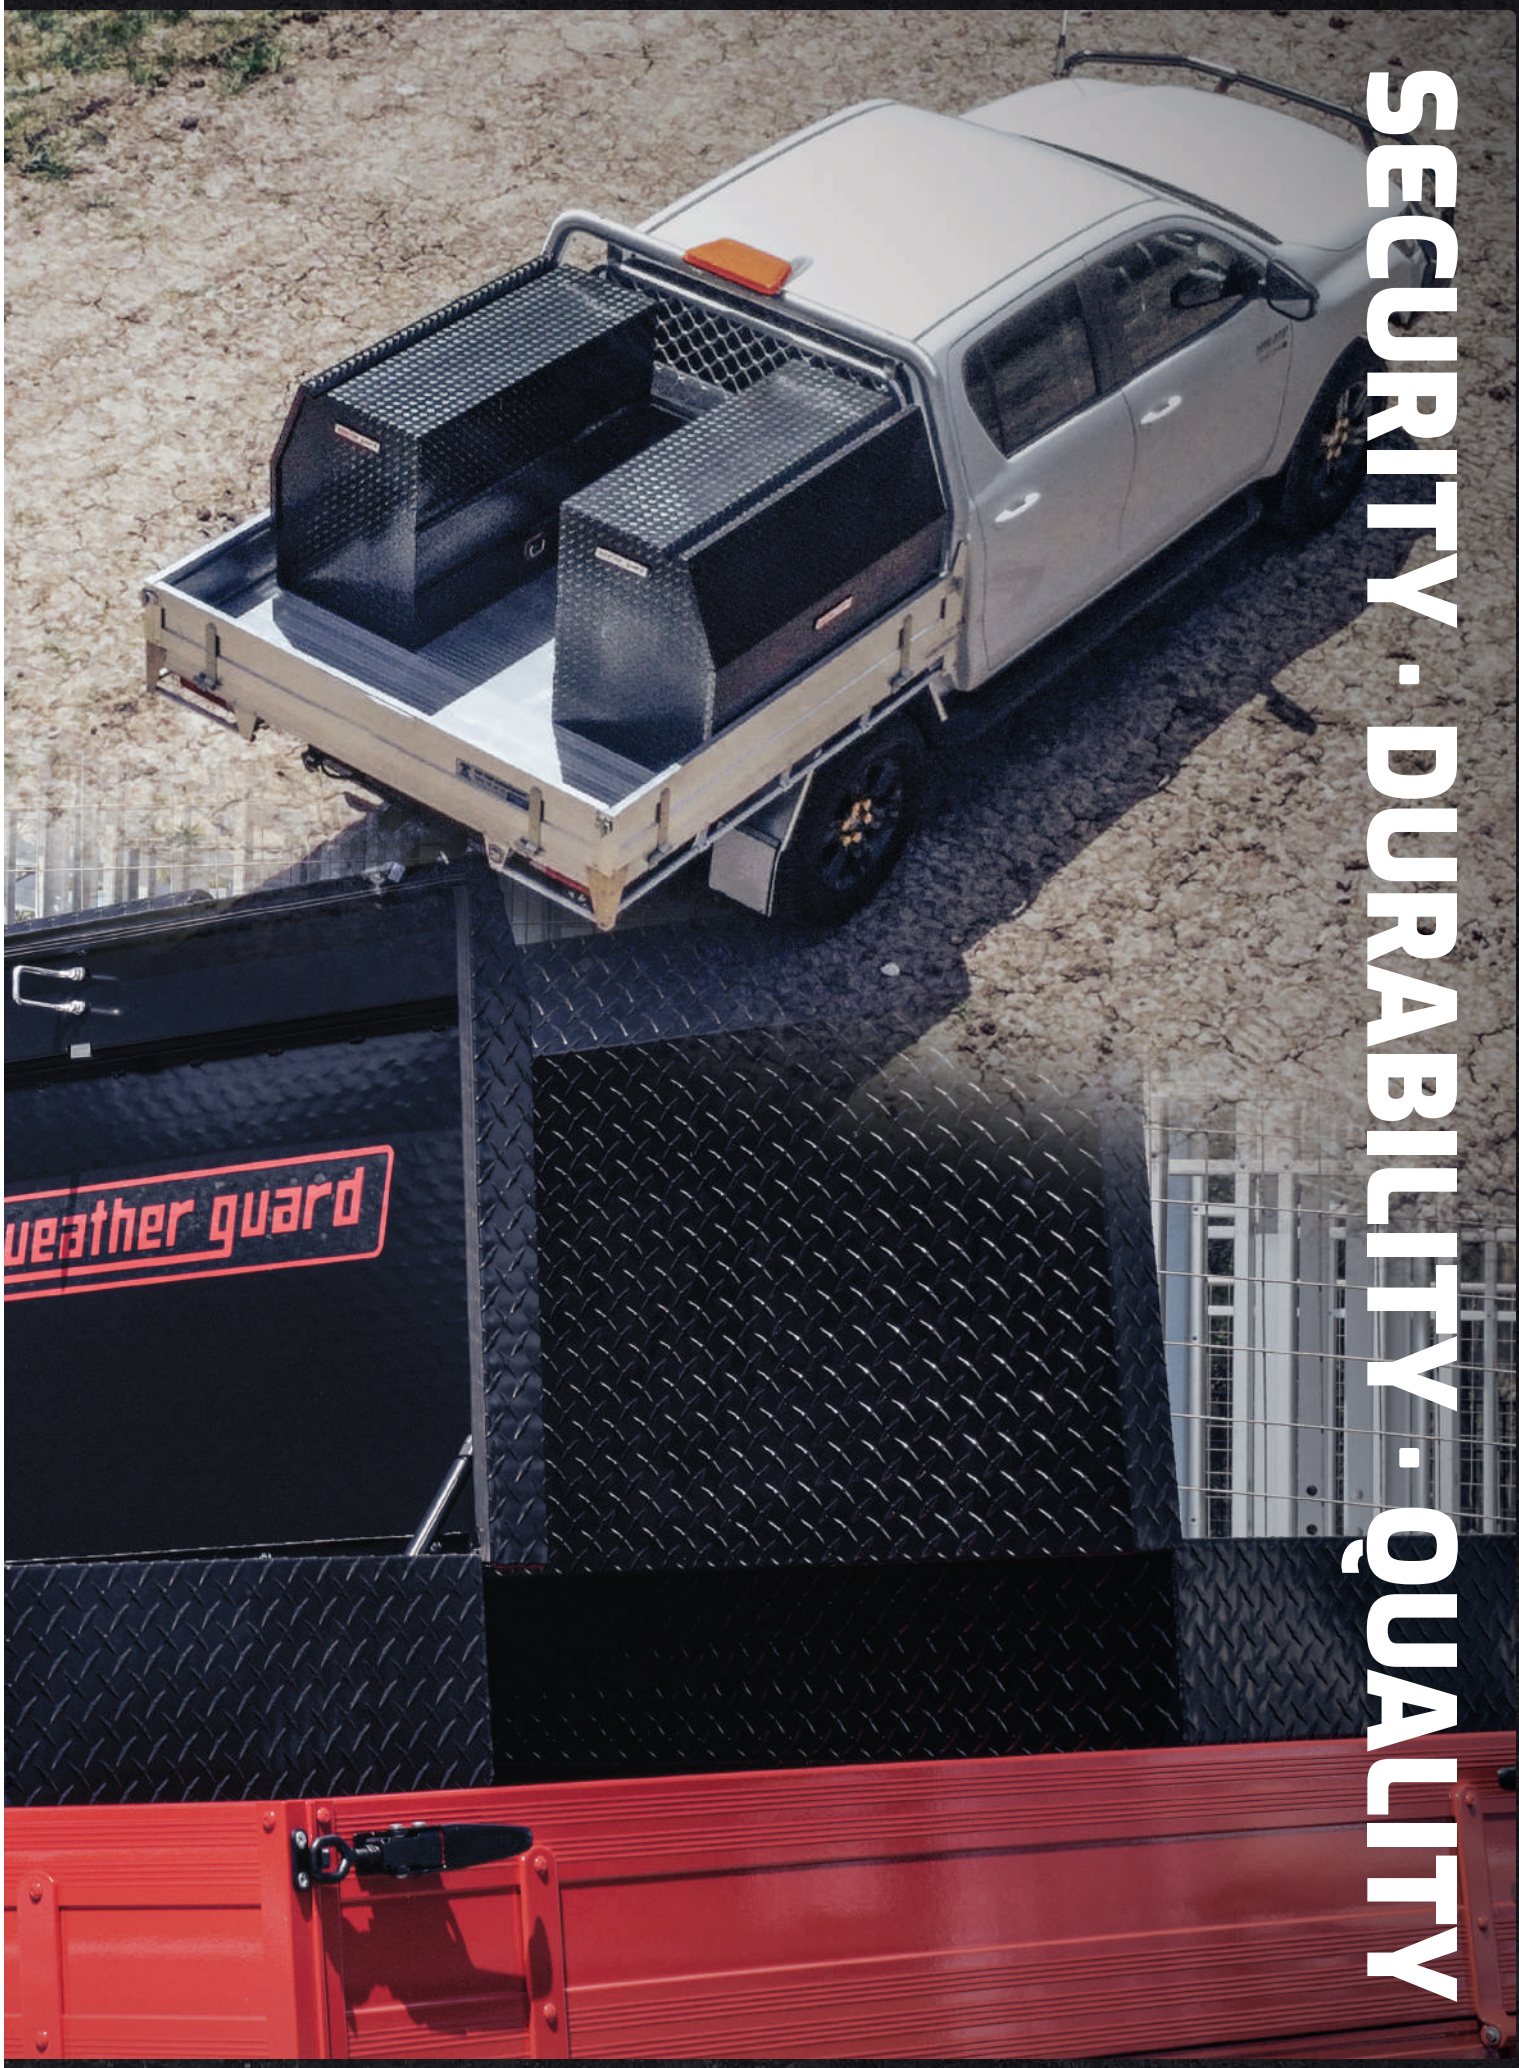

In 2012 Werner Co. announced that it had acquired 100% of the ownership of Knaack LLC. The acquisition brought the industry leading KNAACK® and WEATHER GUARD® brands, which created a product portfolio that can collectively leverage the broader company networks in manufacturing, distribution, sales and marketing.

2023

The same quality and toughness is now in Australia. Designed and Engineered in Australia for Australian conditions. WEATHER GUARD® provides High Quality, Durable, Secure, Smart products that deliver on the promise of servicing **"Work Week to Weekends"**.
